I am a front-end developer with over three years of experience building user-friendly digital solutions. Skilled in Next.js, React.js, and TypeScript, I focus on creating responsive, high-performing interfaces and improving front-end efficiency, achieving results like a 20% performance boost. I work well with teams to ensure projects meet user needs and business goals, reviewing code for quality and delivering reliable results. I'm adaptable, detail-oriented, and enjoy collaborating to create effective and impactful applications.

## Experience

### Front-end Developer | Tenece | Enugu, Nigeria

2024 – Present

- Designed, developed, and maintained school portal systems for universities, including UNN and FUTO, ensuring responsive designs and seamless user functionality using React.js.
- Collaborated with cross-functional teams to implement new features, resolve bugs, and enhance system performance to meet user and institutional needs.
- Leveraged Git for version control and collaborated in an Agile environment to ensure efficient workflow and timely delivery of updates.
- Contributed to the optimization of portal performance and usability, improving the overall user experience for students and administrators.

### Front-end Developer | Serlzo | Enugu, Nigeria

September 2024 – January 2025

- Volunteered on the development of a marketing automation tool, contributing to the design and implementation of responsive features using React, Next.js, and TypeScript.
- Collaborated with cross-functional teams to ensure alignment with user needs and business goals.
- Optimized application performance, achieving a 20% faster load speed through code enhancements and best practices.
- Developed comprehensive documentation to support both developers and end-users.
- Worked on transforming the Serlzo website into a scalable application to improve user engagement and functionality.

## Front-end Developer | Genesys Tech | Enugu, Nigeria

January 2023 – October 2024

- Volunteered to develop a mental health app that connects users to therapists and resources, providing a platform for improved access to mental health support.
- Led the front-end team to design and implement responsive features using React, Next.js, and TypeScript.
- Collaborated with cross-functional teams to align the app's functionality with user needs and goals.
- Optimized application performance, achieving a 20% faster load speed through efficient code and best practices.
- Authored detailed documentation to support developers and end-users in navigating the platform.
- Worked on transforming the app into a scalable and user-friendly tool to enhance mental health awareness and accessibility.
